

Download Active Learning Addison Wesley Active Learning

Active Learning for Fours, the fifth book in the Active Learning Series, has over 470 activities for Fours, 48 months old through 60 months old. The activities are easy to read and do with one child or a small group; "Fours Can" lists help teachers, caregivers, or parents choose the right activities for each child. Ideas on planning environments for Fours and an easy system for writing plans help set the stage for a developmentally appropriate activity program.

Incorporate "active" learning into the curriculum with ease using the complete planning guide with a clean format describing activities and appropriate materials, and a resource and skills checklist. Plus icons identifying developmental stages and suggestions for language development and interaction help teachers direct student progress. Use the series to update programs, train new staff, or develop teaching units.

Note: Citations are based on reference standards. However, formatting rules can vary widely between applications and fields of interest or study.
