At six he finds out a devastating secret that changes his life. He withdraws into his own world, searching for understanding and meaning. Isolated from his family and children of his own age he turns to his angel for love and guidance but even she cannot save him from what is to come. Unable to read and write he joins a gang and at fourteen finds himself before the courts for the first time.

He decided to write his story to make sense of his turbulent early life in the years following the Second World War. From being a cherished child he grew up to become a violent young adult as his life spiralled out of his control. He hopes that sharing his story may help prevent others going down the same road.

Ursula Wong's *The Baby Who Fell From the Sky* is a terrific yarn in the tradition of the South American folk tale. It is the story of Mayu, a woman with a crippled leg who tends sheep in the high mountains of Peru, and who one day, unexpectedly, finds herself a mother. What ensues is a tale told in a straightforward way, with simple language--but it possesses depths and layers and hues of darkness and light. I thoroughly enjoyed it.

Untold secrets of a post-war childhood. A true story of a child born in war-torn London soon after the Second World War whose early memories are of the care and security given to him by his grandmother and a guardian angel who watches over him.

The Boy Who Fell from the Sky is the first of a mind-twisting new YA dystopian series. The world is falling apart in 2055. Floods have devastated London on the eve of the First Space War.

I've crawled deeper into the sheltering back of the three-seat bench that was fastened to me when I fell from the sky. Wet and muddy, I lie there for the rest of the day and night.
