This Handbook has been created by the combined experience of a leading social scientist and a chief executive of a major international research development institution and funder. The editors have recruited a truly global team of contributors to write about the challenges they have encountered in the course of their careers, and to provoke readers to think about how they might respond within their own contexts.

Current research approaches frequently fall short of addressing the challenges faced in EDI research, and this benchmark Handbook brings up to date coverage of research methods in EDI, and advances the development of research in the field.
