

Download New Pathways Medical Education 1994 12 17

Students in the new curriculum learned differently, acquired distinctive knowledge, skills, and attitudes, and underwent a more satisfying and challenging preclinical medical school experience without loss of biomedical competence. These findings should encourage other schools to consider such a curriculum.

New Pathways to Medical Education will inspire physicians, medical scientists, and medical educators around the world to think and act more decisively to reform medical education. And because it documents the development of an innovative curriculum, this study will interest educators in all fields.

For the past 12 years and particularly since 1982, I have encouraged my colleagues in the faculty of medicine at Harvard to explore new pathways in general medical education. These explorations ...

This book details how Harvard Medical School (Massachusetts) overcame prevailing educational inertia and developed a curriculum and educational program consistent with preparing students to practice medicine in the 21st century. The New Pathway in General Medical Education program emphasizes both acquiring current knowledge and developing ...

Pathology in the new pathway of medical education at Harvard Medical School. Author R B Colvin, M S Wetzel Journal. American Journal of Clinical Pathology SCI(E) SCOPUS

The commission recommends that medical schools, in collaboration with their graduate medical education partners, create a new education model that is based on achievement of competencies without a prescribed number of months of study and incorporates the knowledge and skills needed for a twenty-first-century primary care practice. The course of study would occur within a longitudinal clinical ...

New Pathways to Medical Education will inspire physicians, medical scientists, and medical educators around the world to think and act more decisively to reform medical education. And because it documents the development of an innovative curriculum, this study will interest educators in all fields.
