When students learn the difference between how much thinking is required to answer questions at each level, it assists them in not only answering questions, but also in their learning. I've taught the levels to my former students and it was a defining moment in their careers as learners. This strategy paired with the above mentioned increasing rigor in instruction and assignments is a powerful combination.

However, there were significant differences in scores on the language arts, mathematics, social studies, and science portions of the GHSQT: students in the 4 X 4 block scheduling received lower scores than students in traditional scheduling.
