A video produced by the NDSU Extension Service to help you understand how using the unit price lets you find the best buy.

Comparing. Comparing Unit Prices can be a good way of finding which is the "best buy".

So this rate simplifies to, this price per office, I guess we could call it, simplifies to \$35 for every 1 office, which we could also write as 35 over 1 dollars per office, which is the exact same thing as \$35 per office. And we're done. That is the company's price for cleaning a single office: \$35.

Each worksheet has 10 problems using unit rate to find the answer.

The entries note the items purchased, the unit price where applicable, and the total price denominated in pounds, shillings, and pence. Stacked items for sale at the auction house now display the per unit price and per unit buyout price in the item mouseover.

Using Unit Price to Save More on Groceries + FREE Worksheet January 27, 2017 by Sarah If you are looking to start reducing your household expenses, a great place to start is your grocery budget.

Price per unit is the price of an item divided by the number of units of that item in a package. So, let P be price of the whole package and U be units. Price per unit =  $P/U$ . Note that a unit can be any measurement of mass, length, or volume. Alternately, in some packaged items, a unit is just one of that item.

Unit Prices Rates are special ratios where the two things being compared have different units. For example, we could compare the price of purchasing things to the number of

To calculate the unit price of an item, divide the total number of units by the total price. F Using the following prices, calculate the unit price to determine how much it would cost for 7 muffins and 14 juice boxes.
